Work Experience

Endure Software Solutions   *Feb-2017 to Present*

Having 3+ years of experience as a UI Developer using JavaScript, jQuery, BackboneJS, CSS & HTML.
Experienced in Design and Development of **Single Page Applications**.
Developing and maintaining responsive eCommerce applications.
Proficient in gathering requirements, design implementation, delivery.
Has experience in **Agile** work cultures for software development and release management.
Debugged and modified Software Components in web application.
Experience in handling production issues.
Created **Wireframes** and **UI Designs** and built uniform design systems for whole application.
Have good knowledge in **Accesibility** and **SEO**.

At Endure Software Solutions we use **Oracle's Netsuite** which is Cloud ERP to provide eCommerce Solutions for Business of all Scales.
Some of the Clients i worked With **Dominos B2B USA, Nestle Nutrition, SSPC.**

Netsuite provides a basic ecommerce handy website where new features developed and added according to the client's requirement.
Some of the features I worked on.

- Add multiple items to cart on click of a single "Add to Cart" button.
- Role based home page with specific welcome items based on customer roles.
- Implemented "Favourite Items" list, adding/removing items to/from the list.
- Sending welcome email templates to new customers.
- Functionality of multi-shipment i.e. sending one order to multiple shipping addresses (multiple recipients).
- Filtering and sorting functionality in customer's address-book having thousands of records.

The team size is mostly two to three people on all projects.
Did Wireframing and Mockup Designs for the clients with a promise to meet existing identity of the brand to all their respective websites and delivered.

Next Novity   *April-2016 to Jan-2017*

Joined as an intern spent most of the time learning frontend technologies and design tools gained experience in design and developing applications.
